Concerning the Corona virus:

You want the “Blockwart” denunciator against the plague –

**we offer organisation against the entire sick system.**

You scream “Stand still!” and let Krauss-Maffei, Bayer & co. continue producing murder –

**we take action.**

**Every calm carries the storm and the closed door can stop no virus.**

**We carry on!**

A virus requires the apparatus of a living cell to reproduce.

The new Corona virus can hit us so hard due to nothing but the host cell, capitalism. Rarely has it shown it’s barbarism - you cannot have it without - more openly than now!

### **Organise, for Socialism or barbarism is obviously on the agenda...**

... **In Italy**, where doctors have been degraded to gravediggers.

Since, thanks to capitalism and profit orientation on health, there are not enough for medical resources, the gravedigger decides who is to live and who is to die.

In the meantime, the workers of Italy and Spain, just like the workers of this Greater Germany, are supposed to keep sacrificing their health for the capital and keep producing. Not lung ventilators, systemically indispensable cars and things they are supposed to enter the factories for. The rotten imperialism doesn’t leave workers any choice – in Italy and Spain they have been rising up since beginning of march, striking and chanting: “We are not slaughter stock! “

... **At the borders** of states and at the borders between the top and the bottom, which nobody wants to speak about, but where clearly death is near. Here it shows, what capital it is capable of – before, during and after Corona - in the Mediterranean, in the prison-camps for refugees in Greater Germany, through homelessness and unemployment. They are the collateral damage in this war without bombs – the death sentence spoken in the name of humanity.

... **In the 30 year of Greater Germany**, where the concept of the great national community “Volksgemeinschaft” is puked at our feet, as soon as lives are suddenly at stake, while we are sick with a health system which was administered to us by the chancellor of the annexation Kohl: profit oriented hospitals since 1985. Health becomes a commodity by law. “Mental-moral turning point” is what they called the withdrawal from financing hospitals. The number of private hospitals has doubled since 1991, while public hospitals are down to 30%.

Alone the capitalist South Korea proves these days:

**A virus requires comprehensive testing and disinfection of public spaces, not a German “Volksgemeinschaft” community celebrated in front of the cameras, not obedience of the unions’ leaderships which cancel May Day and not the confinement of an entire people.**

**30 years of annexation of the GDR are enough!** And 75 years after the liberation from Hitler fascism show...

...We could have had it another way, had we taken up the fight against the annexation of the GDR. Here the health system was destroyed and sickened into private hospitals, while it would have had the societal structures, needed today, to get ahead of a virus like Corona quicker.

...and we can have it another way if revolution is not only spread as a fairy tale through our mouths, but is organised now – especially in times like this.

... The exploitation of man by man will keep offering breeding ground for plagues, be it Ebola, Corona, Swine flu, pestilence or influenza.

... The fight for revolution does not stop just because of a infection protection law, a state of emergency or a curfew is declared!

### German Desk-Culprits

The new Corona virus is and remains highly contagious, but the culprits who destroyed the health system, privatised research and pharmaceutical companies and keep on further ruining humans and environment every day – they are attackable and beatable! The murderers are still called Bayer, Daimler, Deutsche Bank & co. Their executors are still sitting in the offices and ministries of this state.

That is why the fight for revolution is far more than that for the factories.

It is also the fight for a health system: accessible for all, centralised, free of charge and fundamentally prophylactically. A health system in which research is not geared towards profit but towards sustaining society's health.

### The fight for revolution and socialism is the fight for the people's health...

...against the dumbing down and degeneration of the training in medical and social professions. Disinfecting of hands is important, but where was the scientific teaching on how the Corona virus functions and how a society should handle it? This is not an acute but rather a general, fundamental question which can only be solved generally and fundamentally.

...for production for society. Enough cars stand around the world already, but where is the fight for the long term production of medication, medical appliances and other essentials?

...for more teachers, nurses, doctors who are comprehensively educated for the purpose of a society which can no longer turn health into a commodity?

... It is the fight for right of assembly, the right to strike and the possibility to organise as youths. For what is the use of confining people if the system of profit remains the same and sickness is not combated societally but is actually promoted?

What use is the fight against fascism and war if, in the case of a plague, one cooperates with and lets oneself be treated and cared for by an apparatus of force that has ben fostered with endless billions for the past 30 years and which is perforated by fascists and warmongers?

But then that is precisely the difference between socialism and barbarism.
